Cut-Out Details

- 1) The ducting can also be connected at the back.
- ② The ventilation system is fastened in the cut-out using clamps. A solid installation surface, e.g., made of wood, is required. Make sure that the structure can support the load. Around the clamps, components such as supports and ducting must be at least 1" (25 mm) from the cut-out.
- 3 Alternatively, the ventilation system can be secured to four fixing points on an interim shelf.
- 4) There are additional fixing points on the installation surface.
