

## LW25 COMFORT PLUS HUMIDIFIER

The LW25 Comfort Plus Humidifier ensures efficient humidification with innovative technology. The simple, intuitive operation includes fully automatic control. Ideal for living rooms.

### FEATURES

Clean, filter-free humidification  
VentWave™ 3D disk stack  
Intuitive touch display  
Simple and easy to clean

**MSRP** \$449.99

**SKU** 7026536 (White),  
7026436 (Black)

**UPC Code** 801505265365 (White),  
801505264368 (Black)

### YOUR BENEFITS

- Healthy air humidified to an optimal 40–60 %
- Cold evaporative humidification without the use of filters
- Uses tap water
- Reduction of pollen and house dust particles
- Harmful pollutants in the air naturally reduced at an indoor humidity of 40–60 %
- Digital hygrostat monitors and controls relative humidity
- Interactive touch display
- Durable and very low-maintenance
- Super-quiet operation
- Made in Germany

For spaces up to 485 ft<sup>2</sup>

Air humidified to an optimal 40–60%

Reduction of pollen and house dust particles

Air pollutants naturally reduced down to 10-µm (at indoor humidity of 40–60%)

Interactive touch display

The LW25 Comfort Plus Humidifier with our new VentWave™ disk stack creates healthy humidity and naturally reduces harmful pollutants in the air. So easily you'll hardly notice it working. Simply fill with water – no need for filters. The humidifier uses the proven cold evaporation principle. The touch display on the top of the Comfort Plus enables easy, convenient control. The automatic mode makes operation even simpler. Switch to sleep mode for ultra-quiet operation in your bedroom. Messages on the display remind you when it's time to make adjustments. Easy, no-fuss cleaning is a standout feature of the LW25 Comfort Plus Humidifier. With a power consumption of less than 10 watts, the LW25 Comfort Plus is extremely energyefficient. It is ideal for living rooms.

#### VentWave™ 3D disk stack

A European patent is pending for our innovative VentWave™ disk stack. It features thousands of tiny openings which ensure that far more water molecules evaporate in the same time than on a flat surface. This achieves a more efficient evaporation performance with much less material. You can easily dismantle the innovative VentWave™ for cleaning.

#### Intuitive touch display

Simply tap to switch on or off, three speeds, sleep mode with dimmed display and ultra-quiet speed, automatic mode which matches speed to current humidity. Controlling your Comfort Plus Humidifier for ideal indoor air quality couldn't be easier. The display also indicates when actions are due – fill the water tank, run service and intensive cleaning program. That makes the LW25 Comfort Plus even easier to use. Thanks to the integrated hydrostat, the display indicates and controls the air humidity in real time.

#### Simple and easy to clean

Simply lift the electrical unit and fan out of the housing in one movement. To clean your appliance every 14 days or so, empty out the water, remove any deposits in the tray, rinse the disk stack with water, fill with fresh water and Venta hygiene additive. Job done.

Model	LW25 Comfort Plus
Colors	White/Black
Coverage area	Up to 485 ft <sup>2</sup>
Interactive touch display	Standard
Measuring sensors	Humidity
Water hygiene	Accessories
Speeds	3 + Automatic
Noise emission	24 / 34 / 44 dB (A)
Power consumption (speeds 1–3)	3 / 5 / 8 watts
Water content (max.)	2-gallons
