

LW45 COMFORT PLUS HUMIDIFIER

The LW45 Comfort Plus Humidifier ensures efficient humidification with innovative technology. The simple, intuitive operation includes fully automatic control. It is ideal for open-plan living spaces.

FEATURES

Clean, filter-free humidification
VentWave™ 3D disk stack
Intuitive touch display
Simple and easy to clean

MSRP \$549.99

SKU 7046536 (White),
7046436 (Black)

UPC Code 801505465369 (White),
801505464362 (Black)

YOUR BENEFITS

- Healthy air humidified to an optimal 40 to 60 %
- Cold evaporative humidification without the use of filters
- Uses tap water
- Reduction of pollen and house dust particles
- Harmful pollutants in the air naturally reduced at an indoor humidity of 40 to 60 %
- Digital hygrostat monitors and controls relative humidity
- Interactive touch display
- Durable and very low-maintenance
- Super-quiet operation
- Made in Germany

Spaces
up to 645 ft²

Air humidified
to an optimal 40–60%

Reduction of pollen and
house dust particles

Air pollutants naturally reduced
(at indoor humidity of 40–60%)

Interactive
touch display

The LW45 Comfort Plus with our new VentWave™ disk stack creates healthy humidity and naturally reduces harmful pollutants in the air. So easily you'll hardly notice it working. Simply fill with water – no need for filters. The Humidifier uses the proven cold evaporation principle. The touch display on the top of the Comfort Plus enables easy, convenient control. The automatic mode makes operation even simpler. Switch to sleep mode for ultra-quiet operation in your bedroom. Messages on the display remind you when it's time to make adjustments. Easy, no-fuss cleaning is a standout feature of the LW45 Comfort Plus. With a power consumption of less than 10 watts, the LW45 Comfort Plus is extremely energy-efficient. The large water tray (3-gallons) means you don't have to constantly top up the water. The LW45 Comfort Plus is ideal for open living spaces.

VentWave™ 3D disk stack

A European patent is pending for our innovative VentWave™ disk stack. It features thousands of tiny openings which ensure that far more water molecules evaporate in the same time than on a flat surface. This achieves a more efficient evaporation performance with much less material. You can easily dismantle the innovative VentWave™ for cleaning.

Intuitive touch display

Tap to switch on or off, select between three speeds, sleep mode with dimmed display and ultra-quiet speed, automatic mode which matches speed to current humidity. Controlling your Comfort Plus Humidifier for ideal indoor air quality couldn't be easier. The display also indicates when actions are due – fill the water tank, run service and intensive cleaning program. That makes the LW45 Comfort Plus even easier to use. Thanks to the integrated hydrostat, the display indicates and controls the air humidity in real time.

Simple and easy to clean

Simply lift the electrical unit and fan out of the housing in one movement for easy cleaning and care.

Model	LW45 Comfort Plus
Colors	White / Black
Coverage area	Up to 645 ft ²
Interactive touch display	Standard
Measuring sensors	Humidity
Water hygiene	Accessories
Speeds	3 + Automatic
